

Dear **TEACHER/SCHOOL**

Your school has been invited to participate in a free and exclusive learning program in 2025 ; *THE POWER OF ACTIVISM educational impact strategy.*

**This invitation is being offered to 8 secondary schools nation-wide.**

My name is **Michelle Dado-Millynn** and I am the producer of a new Australian documentary called 'The Power of Activism'. This award-winning film shines a positive light on a group of young people who have activated their citizenship and are changing how governments and major companies think about the environment and sustainability.

This learning program uses the documentary to activate real-world and project based learning. Students will also further develop their literacy skills and other general capabilities.

As part of the program, your school will receive :

- First access to the film
- Time with me throughout the process *as the film's creator and producer*
- Support to develop real community environmental project/s
- Projects to be videographed internally with support from ATOM if needed
- Students' work will feature in the film's educational resource (to launch in 2026)

Here are some ways that schools can use this program to add value to their curriculum :

- Year 8 Geography (Landforms and Landscapes unit)
- Year 10 Geography (Environmental Change and Management unit)
- Year 9-10 elective
- Year 11-12 vocational education and training
- Student excellence program / Student groups
- **Open to any ideas teachers may have**

Here is a link to the films' trailer @website [www.thepowerofactivism.com](http://www.thepowerofactivism.com)

I will send a private link to the film for teachers who are interested in this program.

At a time when there is much in the world to feel hopeless and helpless about, this learning program will inspire your students and cultivate hope and meaning through your curriculum.

Recent feedback at a United Nations screening for school students :

*"The Power of Activism shows what can be done and gives hope !"*

Teacher/school recruitment in this Term 3 - project decided on and planning in this Term 4.

Project commencement in Term 1, 2025 – completion by end of Term 2, 2025.

Please sign and date below as confirmation of your school's participation in this unique learning opportunity.
